Opening Statement

As previously communicated to the community, the main utility of this project is develop a form of an anti mev bot.

Since its launch the community has rapidly formed into unbelievable heights considering how young it is, the commitment demonstrated by the community, whether it has been to buy up dips, raid twitter posts/polls or more impressively stick together through adversity, I as the dev have decided to scale up the development accordingly with more utilities than previously planned.

Mikoto Gensanchi

The Mikoto Gensanchi is the home of the Tsukuyomi - No - Mikoto's Native Token. Within the Gensanchi you will have the ability to not only earn the aforementioned tokens but also be cumulatively unlock many features that will give you greater earning potential.

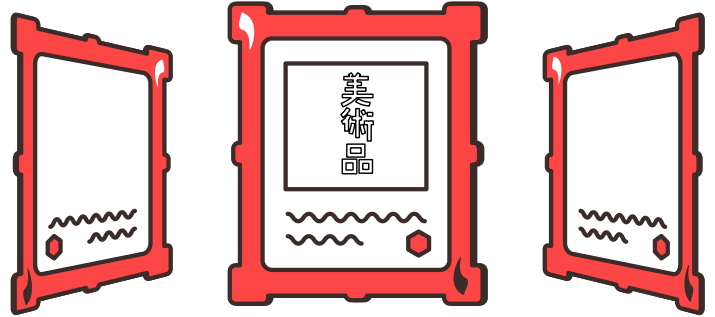

Mikoto Nfts

The Tsukuyomi Mikoto NFT Collection will consist of 8888 Sensei Styled Gods. Each NFT will be different in every way shape & form. There will be 88 Master Sensei NFTs that wield extra earning power thus within the Gensanchi.

Nft Staking

Our NFT Staking Platform Will go Live alongside the launch of our illustrious NFT Collection. You'll instantly be able to commit your NFT asset to the staking protocol (locking it for a set duration of time). Whilst pooled the illiquid NFT will begin generating passive income/rewards in our native token - Tsukuyomi No Mikoto.

Virtual Art Gallery Dao

We will build a DAO styled Virtual Gallery. Community members can upload artwork, holders can vote for their favourite artwork, the winning artists (by vote) will win a quantity of ETH as a prize and the winning art turned into a 1 of 1 NFT. This unique NFT can be used inside the Gensanchi earning life time rewards by staking.

You do not need to be a holder of the native token to enter into/submit your art piece, although if you wanted to claim your 1 of 1 NFT, you will need to be a holder.

If you decide not to claim your 1 of 1 NFT it will be gifted to one lucky holder in a raffle/give-away mikoto style.

Closing Statement

Timelines for the aforementioned utilities will be communicated to the community within the next 7-14 Working Days. We are currently working on our whitepaper & Roadmap and we're currently revamping our website.

I WILL NOT BE STOPPING HERE EITHER!

I'd love to hear other ideas from the community too!

When it comes to building & further adding to our Gensanchi ecosystem there is nothing we cannot achieve together! Again my commitment to the community is my main priority, together we will continue to grow OUR project to unprecedented heights!
